

CURRICULUM VITAE

Dr Ashishsinghal

Designation: Prof & Head, Department of surgical oncology

Work contact details: Dr RMLIMS, Lucknow

Email- ashishpgi@yahoo.co.in / drashish.singhal@gmail.com

Mobile- 7275068923/9453077109

Corresponding address: Room No30, administrative block 2nd floor, Dept. of s.onco, DrRMLIMS Lucknow

Educational Qualifications

Year	Degree	Institution / university
July 2010	MCh (S oncology)	King George Medical University, Lucknow
June 2006	MS (Surgery)	Post Graduate Institute Of Medical Education And Research, Chandigarh
March 2003	MBBS	JawaharLal Nehru Medical College AMU , Aligarh

Awards & Training / Fellowships

1. Worked as a Senior research Fellow in thoracic oncology division, Department of surgical oncology , Tata memorial centre , Mumbai 2010
2. Robotic observership at galaxy cancer hospital pune 2010
3. Clinical Observer-ship in surgical oncology at Tata memorial hospital , Mumbai 2010
4. Oncoreconstruction certificate course at Tata memorial Mumbai 2014
5. CREST course for laparoscopic colorectal surgery at Cuttack 2015
6. CADGO Training for peritoneal surface malignancies & HIPEC at AIIMS 2016
7. **Gold medal** in MBBS
8. Recipient of AMU scholarship

Professional experience

■ Specialization - surgical oncology

As surgical oncologist, I performed more than 2500 major and close to 2000 minor procedures. The majority of work is related to head and neck, breast, gynaecological, oesophageal, gastric and colorectal cancers. Some of landmark work includes oncoplastic surgeries for breast cancer, compartmental resection for ITF Tumours, free flap reconstruction for head and neck cancer, laser surgeries for cancer larynx, conservative surgeries for larynx in salvage situations, oncoplastic surgeries for breast cancer, cytoreductive & exenteration surgeries for gynaec cancers, carotid body tumour surgeries, Vascular reconstruction in cancer and limb conserving surgeries for bone tumours. I have started advanced minimally invasive surgeries for oesophageal, colorectal and gynaecological cancers and completed successfully 30 cases decreasing the morbidity of extensive surgery and significantly decreasing the hospitalisation time.

completed 11 years working as surgical oncologist and established the department which now has a running MCh course and all complex cancer and minimally invasive surgeries are carried out in the department

Research Work

1. Role of TRUS changes after orchiectomy in advanced cancer Prostate and its correlation with serum PSA.
2. VEGF expression in oral cancer and its correlation with response to chemotherapy
3. Tumour dimension on MRI and its correlation with histopathology in oral cancer
4. Circulating free DNA as a marker in oral cancer

5. Molecular margins in oral cancer : a prospective study
6. EGFR and her 2 neu status in benign gall bladder disease
