Coordinator MEU, Dr.RMLIMS

Organizing Secretary  
**Dr Manish Kumar Singh**  
Member MEU, Dr.RMLIMS

Joint Organising Secretary  
**Dr Navbir Pasricha**  
Member MEU, Dr.RMLIMS

### About The Workshop

Special Feature  
Lecture on  
CBME

Ever since their conceptualization in 1914, MCQs have become an important component of assessment toolbox. Many countries and institutions have shifted to exclusive MCQ testing. The reported advantages include objectivity, quick scoring and ability to test a large number of students in a short span. Because of this, MCQs have been the mainstay of selection examinations the world over.

Concerns have been raised about the quality of items, specially when they constitute high stake testing. Like any other assessment tool, the quality of MCQs is determined not by their format but by their content and design. Inappropriately framed MCQs lead to 'cracking' and risk taking being tested rather than knowledge.

This workshop aims to acquaint the teachers with common issues regarding construction of MCQs and how to avoid those flaws. It will also help them to write questions which can't be answered simply from memory but only from domain specific knowledge.

Organised by  
**Medical Education Unit**  
Dr. RMLIMS, Lucknow, UP

Venue:  
**Conference Hall, Ground Floor, Administrative Block**  
Dr. RMLIMS, Lucknow, UP
